UID EXPERIMENT 8

AIM:

The aim of this experiment is to create storyboards representing the user flow for a **mobile Cab Booking application (Velocity)** using Balsamiq.

PROCEDURE:

1. **Tool Used:** Balsamiq Wireframes (https://balsamiq.com)
2. A new project was created and mobile screens were added to simulate the user's cab booking journey from start to finish.
3. Each screen represents a key step in booking a ride.
4. UI components such as buttons, text fields, maps, icons, and navigation bars were used from Balsamiq's library.
5. The wireframes were designed to be simple, clean, and focused on user interaction and smooth flow.

USER FLOW:

1. **Home Screen** – Users enter pickup and drop location.
2. **Ride Selection Screen** – Users choose vehicle type and view fare.
3. **Ride Confirmation Screen** – Users confirm trip details.
4. **Payment Screen** – Users select payment method and pay.
5. **Driver Tracking Screen** – Shows driver details and live location.
6. **Booking Success Screen** – Confirms ride booking successfully.

HOME SCREEN

Components:

- Pickup location input field
- Drop location input field
- Quick options (Home, Work)
- Map background

- Bottom navigation (Ride, Activity, Profile)

Purpose:

Acts as the starting point where users enter trip details and begin booking.

RIDE SELECTION SCREEN

Components:

- Vehicle options (Sedan, SUV, etc.)
- Fare details
- Ride summary (pickup & drop)
- Confirm button

Purpose:

Allows users to choose the type of ride based on price and comfort.

RIDE CONFIRMATION SCREEN

Components:

- Pickup and drop locations
- Route preview map
- Fare amount
- Payment preview
- Confirm booking button

Purpose:

Lets users verify trip details before confirming the ride.

PAYMENT SCREEN

Components:

- Total fare display
- Payment methods (UPI, Card, Cash)
- Radio button selection

- “Pay Now” button

Purpose:

Enables users to complete payment securely.

DRIVER TRACKING SCREEN

Components:

- Live map view
- Driver details (name, rating, vehicle)
- Estimated arrival time
- Call / Cancel ride options

Purpose:

Helps users track their driver in real time and stay updated.

BOOKING SUCCESS SCREEN

Components:

- Confirmation message (“Ride Booked Successfully”)
- Driver and trip details
- Estimated arrival time
- “Track Ride” button

Purpose:

Confirms that the booking is successful and reassures the user.

RESULT:

The storyboard for a mobile cab booking application was successfully created. The user flow from entering location to ride confirmation and tracking was clearly represented using Balsamiq wireframes.
