EXPERIMENT: UI DESIGN USING RAD MODEL (AXURE RP)

AIM

To design and develop a **Student Portal Mobile UI** using the **RAD (Rapid Application Development) model** with interactive prototypes in **Axure RP**.

OBJECTIVE

- To understand RAD lifecycle stages
- To design user-friendly UI screens
- To create interactive prototypes using Axure RP

SOFTWARE USED

- Axure RP 11
- Windows OS

RAD MODEL PHASES

🔹 PHASE 1: REQUIREMENTS PLANNING

✓ Identified Features:

- Login system
- Dashboard
- Marks display
- Attendance tracking
- Navigation system

✓ User Actions:

- Login
- View marks

- View attendance
- Navigate between screens
- Logout

🔹 PHASE 2: USER DESIGN

✓ Designed Screens:

1. Login Screen
2. Dashboard Screen
3. Marks Screen
4. Attendance Screen

✓ Design Elements:

- Mobile layout (390 × 844)
- Cards with rounded corners
- Buttons and navigation
- Icons and text alignment

✓ Tools Used:

- Rectangle (for cards)
- Text fields
- Buttons
- Icons

🔹 PHASE 3: CONSTRUCTION

✓ Developed Interactive Prototype:

- Created UI screens in Axure
- Added navigation using **OnClick → Open Link**

✓ **Navigation Flow:**

Login → Dashboard → Marks / Attendance
Dashboard → Logout → Login
Bottom Navigation → Switch screens

✓ **UI Features Implemented:**

- Login form with username & password
- Dashboard with cards (Marks, Attendance)
- GPA card with progress bar
- Subject-wise marks display
- Attendance overview with percentage
- Bottom navigation bar

🔹 **PHASE 4: CUTOVER**

✓ **Finalization:**

- Prototype tested using Preview
- UI refined with spacing and alignment
- Ready for deployment

✓ **Output:**

- Interactive mobile UI prototype created
- Demonstrates complete student portal workflow

SCREEN DESCRIPTIONS

1. LOGIN SCREEN

- Username & Password input
- Login button
- “Forgot password” option

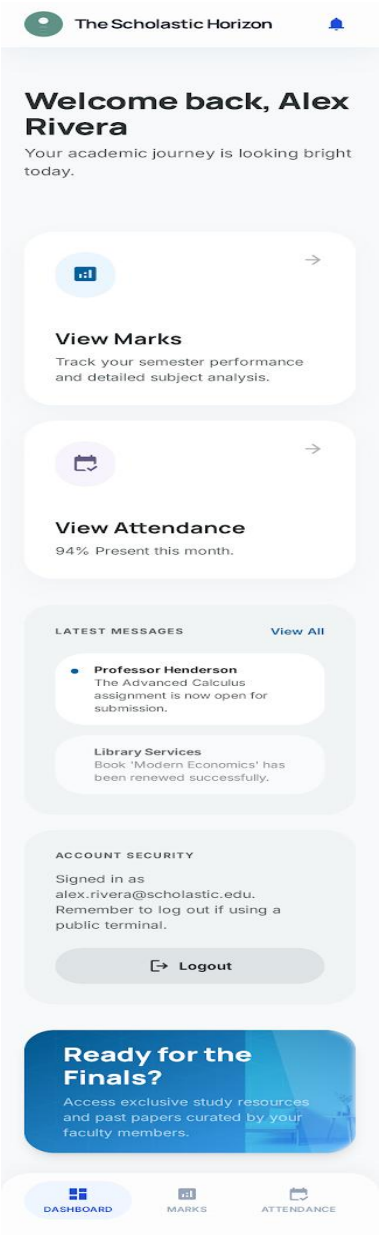
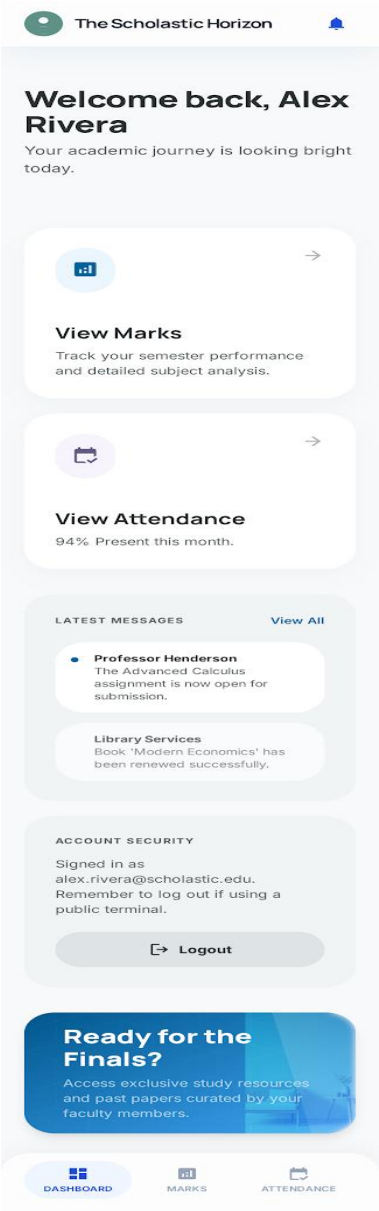
2. DASHBOARD SCREEN

- Welcome message
- Cards:
    - View Marks
    - View Attendance
- Latest messages section
- Logout option
- Bottom navigation



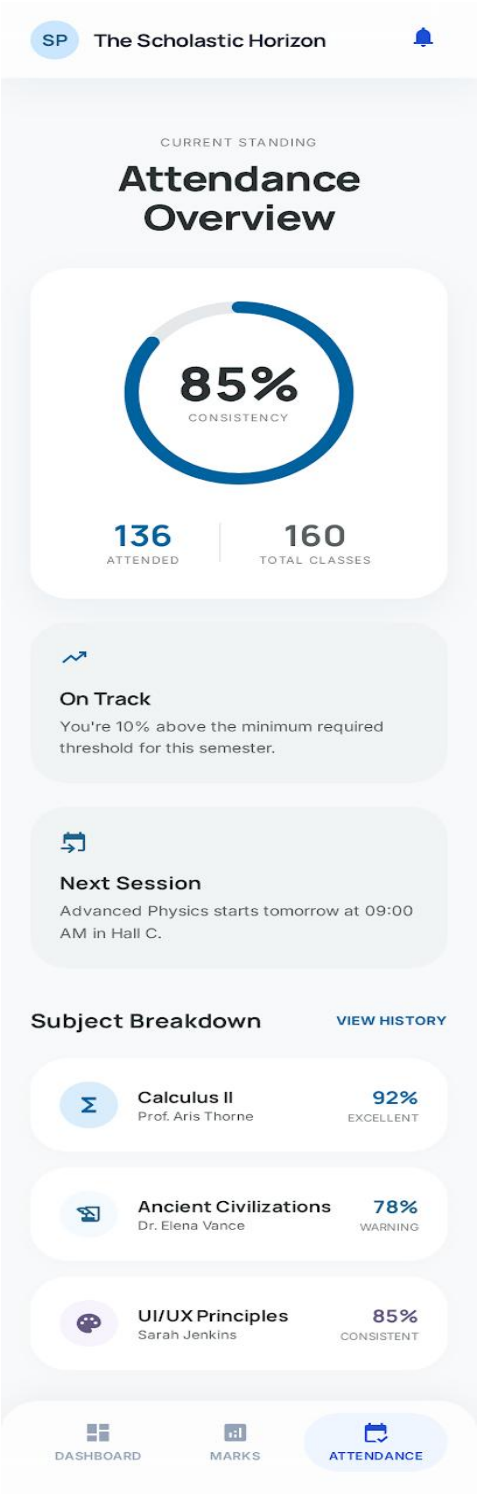
3. MARKS SCREEN

- Academic Performance title
- GPA display (3.82)
- Progress bar
- Subject cards:
    - Mathematics
    - English
    - Science
- Assignment feedback



4. ATTENDANCE SCREEN

- Attendance percentage (85%)
- Circular progress UI
- Attended vs Total classes
- Subject breakdown



ADVANTAGES OF RAD MODEL

- Faster development
- Easy modifications
- User feedback integration
- Suitable for UI-based applications

RESULT

Thus, a **Student Portal UI prototype** was successfully designed and implemented using the **RAD model in Axure RP**, demonstrating interactive navigation and modern UI design.
